## SUMMARY

Recent B.Tech graduate in Artificial Intelligence and Machine Learning with practical experience in AIML, computer vision, and data analytics. Completed internships at Tata Motors and Nexanova Protech, working on YOLO-based detection, AI assistants, IoT data workflows, and Power BI dashboards. Skilled in Python, OpenCV, YOLO, SQL, Power BI, Excel, and deep learning.

## EDUCATION

### Sanjay Ghodawat University

*B.Tech in Artificial Intelligence and Machine Learning – CGPA: 7.76*

Kolhapur, Maharashtra

2026

## EXPERIENCE

### Tata Motors

Jan 2026 – May 2026

*Intern – Computer Vision & AI (On-site)*

- Worked on computer vision, AI-based automation, and IoT data workflow projects in an industrial production environment.
- Developed real-time object detection solutions using Python, OpenCV, YOLO, and machine learning models.
- Collaborated on industrial automation workflows involving sensor data collection, processing, and system integration.

### Nexanova Protech

Sept 2025 – March 2026

*Intern – Backend Development*

- Engineered backend modules for an ERP system using microservices architecture for training institute operations.
- Developed role-based workflows for admin, trainers, and students.
- Managed backend services and workflows for system operations.

## PROJECTS

### Campus Core AI | *Python, AI, NLP* | Final Year Project

- Designed a multi-agent AI system to automate college services and improve user interaction.
- Implemented an AI Admission Counsellor Agent to handle admission-related queries using NLP.

### HIRA AI Assistant | *Python, LLM, NLP* | Tata Motors

- Built an AI-powered assistant to retrieve Hazard Identification and Risk Assessment information through natural language queries.
- Improved access to safety documentation by enabling faster search, structured responses, and automated query handling.

### Leaf Spring Orientation Detection System | *YOLO, OpenCV, PLC* | Tata Motors

- Designed a YOLO-based model achieving ~90% accuracy for real-time leaf spring orientation detection.
- Integrated PLC communication to read and write industrial data simultaneously for automation workflows.

### Canteen Data Analysis Dashboard | *Power BI, Excel* | Tata Motors

- Analyzed 1,000+ records to identify consumption patterns and optimize resource usage.
- Designed interactive Power BI dashboards to visualize insights and support decision-making.

## TECHNICAL SKILLS

**Programming & Querying:** Python, C, C++, SQL

**AI / ML:** TensorFlow, PyTorch, OpenCV, YOLO

**Visualization:** Power BI, Tableau, Excel

**Tools:** ChatGPT, Claude, Cursor, GitHub

## CERTIFICATIONS

### Deloitte Data Analytics Job Simulation

Forage

- Completed a virtual job simulation focused on data analysis and forensic technology tasks.

### Python for Data Science and Machine Learning Bootcamp

Udemy

- Gained hands-on experience in Python, data analysis, and machine learning projects.
